**INSTALLATION NOTES**

Genesis Condition: Straight panel runs of more than 48" without supporting work surface and pedestal or end panel may act as a area divider, but if handled may result

in panel sway from the near attached focal point.

Solutions: Compatico recommends using a "T" connection with another perpendicular frame and tile and center-mounted (to the perpendicular frame and tile) wall-starter bracket. Note contact Compatico Sales Representatives for new news as we are always reviewing new product alternatives (i.e. floor-flat support legs, or an end of panel run weighted stabilizer.

All Systems Condition: Straight panel runs of more than 6' without supporting work surface and pedestal or end panel should not be specified. A focal point of attachment for panel runs should not exceed 6' without some connections at top and bottom.  
Solutions: Use a two or three way connection adding additional frame and tile for stability at the end of the run. Or use a "T" connection with another perpendicular frame and tile, for example center-mount a wall starter bracket to the middle of an additional perpendicular frame and tile set up.

All Systems Condition: Straight worksurface spans of 52" or more may bow with weight loads  
Solution: Must be supported with Worksurface Spanner

Genesis Condition: Doorframe is meant for in-line panel situations only. However, modifications can be made to allow it to come off from a two or three way post.  
Solution: Drill out the threads on the corner blocks.

AO Condition: Hanger frames, rods, blocks are standard in DT. You need a special finish.  
Solution: 1) Dealer must obtain a price quote from Customer Service Representative  
2) Customer Service Rep must note on customer order the items to be painted with special finish.

All Systems Condition: Value Task Light part numbers don't clearly identify size of shelf pan that they fit  
lights fit. Solution: When quoting value task lights please read the description of what size shelf pan the

UNP064.2430BK FITS 24"-30"-36"	ACTUAL SIZE 21.25 LONG
UNP064.3642BK FITS 42"-48"	ACTUAL SIZE 34.25 LONG
UNP064.4860BK FITS 54"-60"	ACTUAL SIZE 46.25 LONG.

We are in the process of changing the numbers to be a truer representation of size.
